

Company fact sheet

Dukosi is the technology company developing revolutionary technologies that dramatically improve the performance, safety, and efficiency of battery systems, and enabling a sustainable battery value chain. The company is first-to-market with its unique chip-on-cell battery monitoring solution.

"Dukosi is at the forefront of battery system innovation, and we are enabling a step change in safer and more efficient batteries to power our electric future. Our unique technology is key to help create a sustainable battery value chain."

Mark Pinto, CEO

About us

- ✓ Established in 2003
- ✓ Headquartered in Edinburgh, UK
- ✓ Sales offices in USA, Germany, South Korea & China
- ✓ 100+ employees

Solutions

Dukosi's Chip-on-cell battery monitoring solution enables;

- ✓ Simplified and scalable battery design
- ✓ Synchronized measurements of all cells
- ✓ 24/7 monitoring of each cell
- ✓ More accurate & granular data
- ✓ Lifetime cell-level data traceability
- ✓ Sustainable battery value chain

Applications

- Automotive
- Industrial transportation
- Energy storage systems

Expertise

- System-on-chip development
- Embedded software
- In-depth battery knowledge

Global Operations

Research & development;
Edinburgh, UK

Sales & Support;
UK, U.S.A, Germany, China, South Korea

Manufacturing partners;
Global Foundries™, Singapore
Amkor Technology®, Philippines
